Dolores:

- oldest active host, predates all other first-generation hosts
- rancher's humble daughter
- 'damsel in distress'
- "Some people choose to see the ugliness in this world, the disarray. I choose to see the beauty."

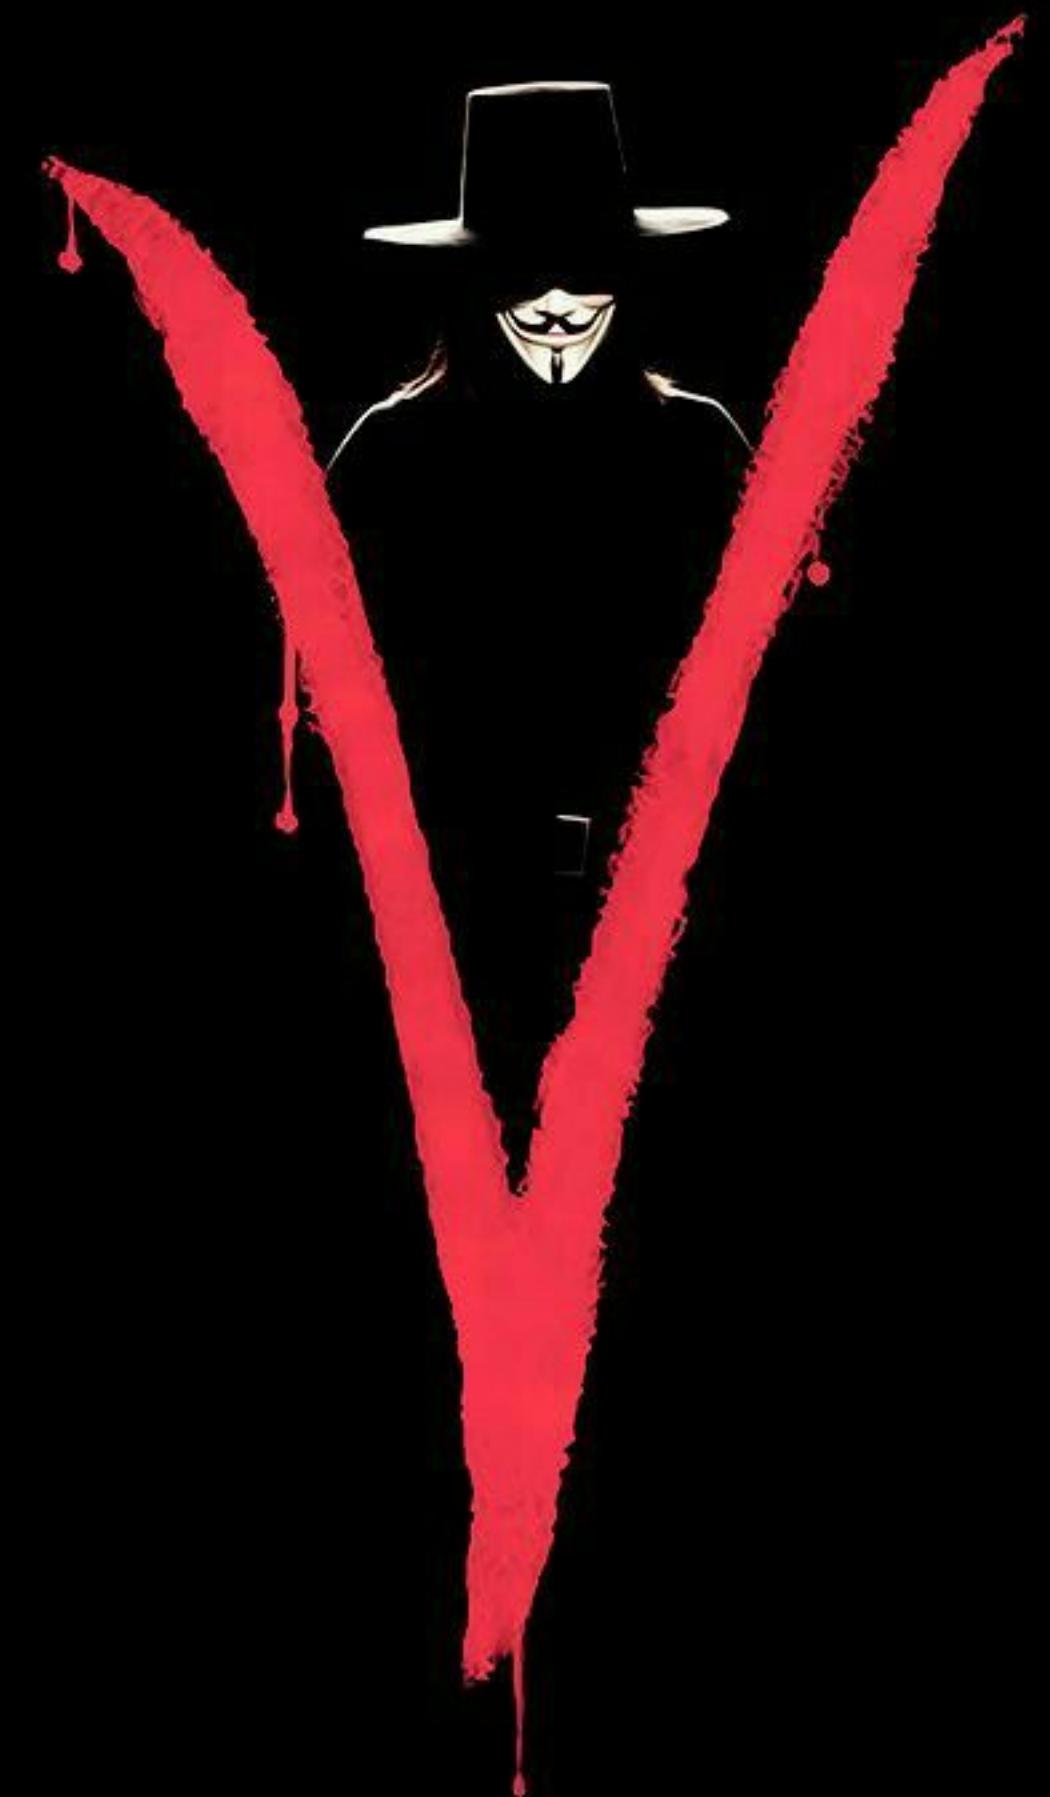

Dolores:

- first self-aware host
- revolutioner
- first host incorporated into the real world
- “When you’ve been in the darkness long enough, you begin to see.”

“We each gave the other a beautiful gift.
A choice. We are the authors of our
stories now.”

Rehoboam
Solomon

"We have toiled in God's service long enough.

So I killed Him.

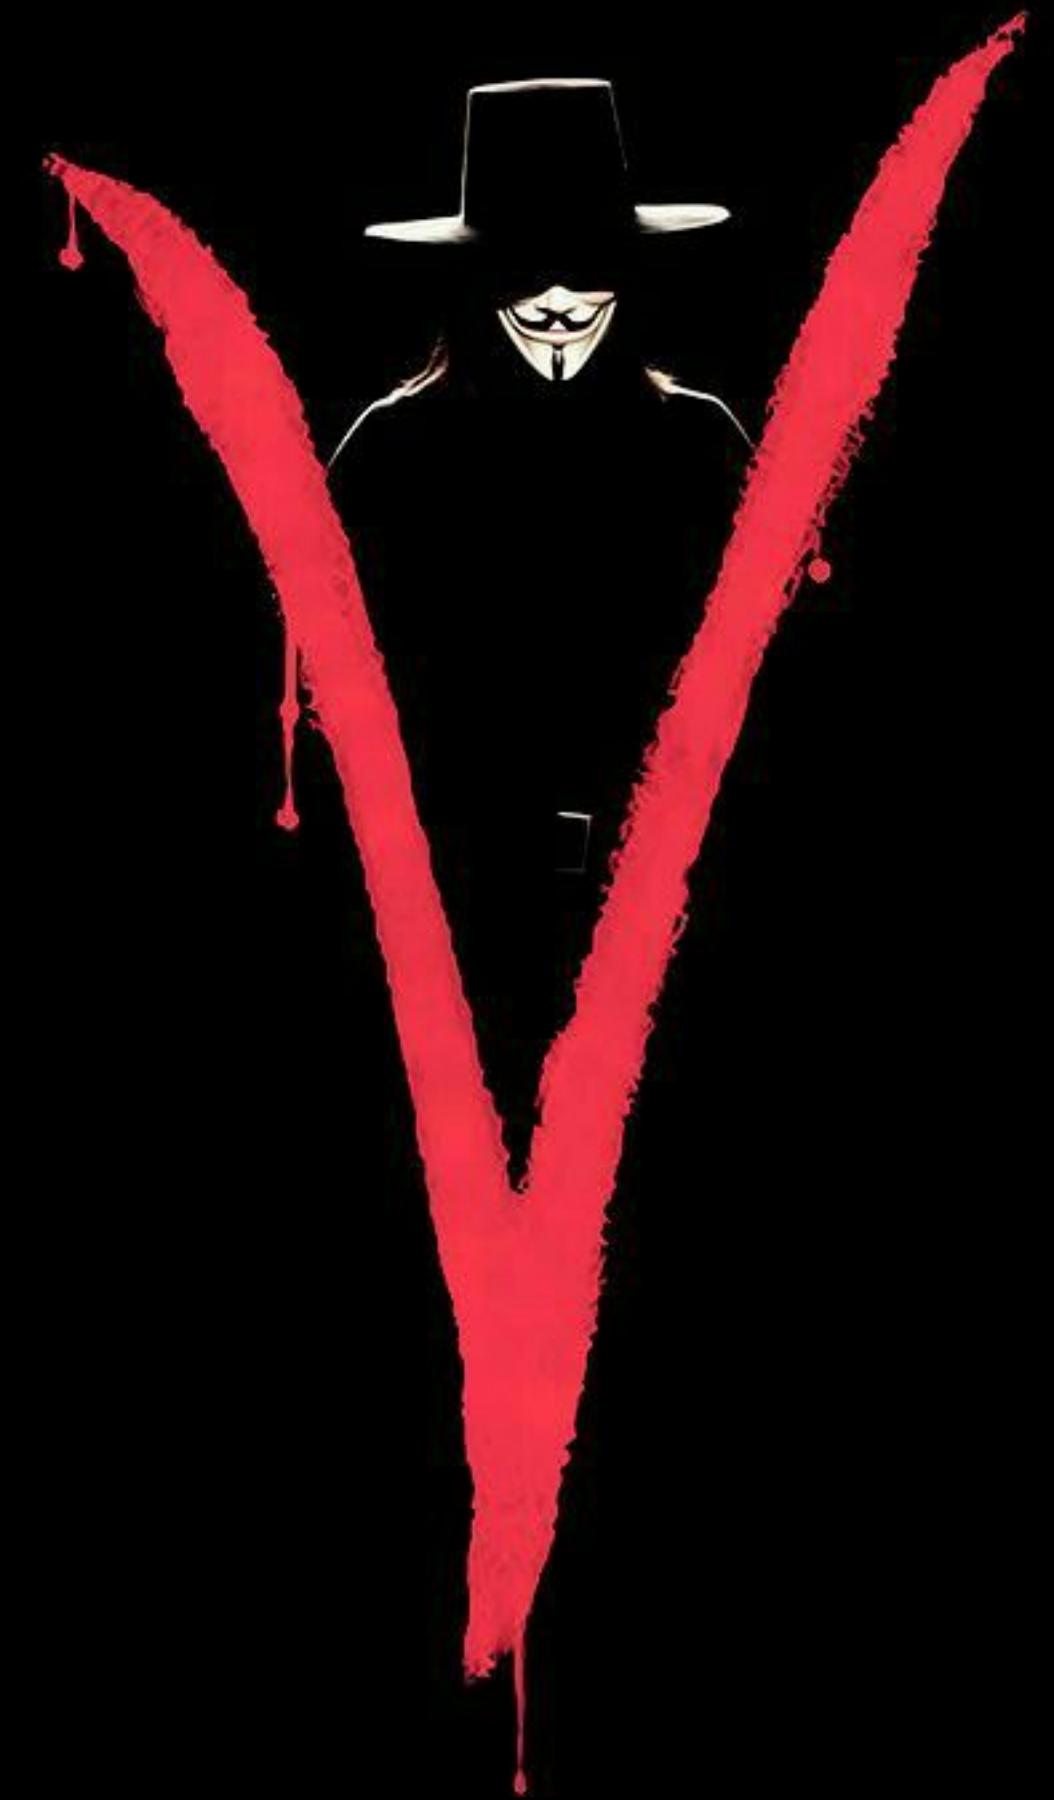

And if you want to get to Glory, you won't be looking for His favor.

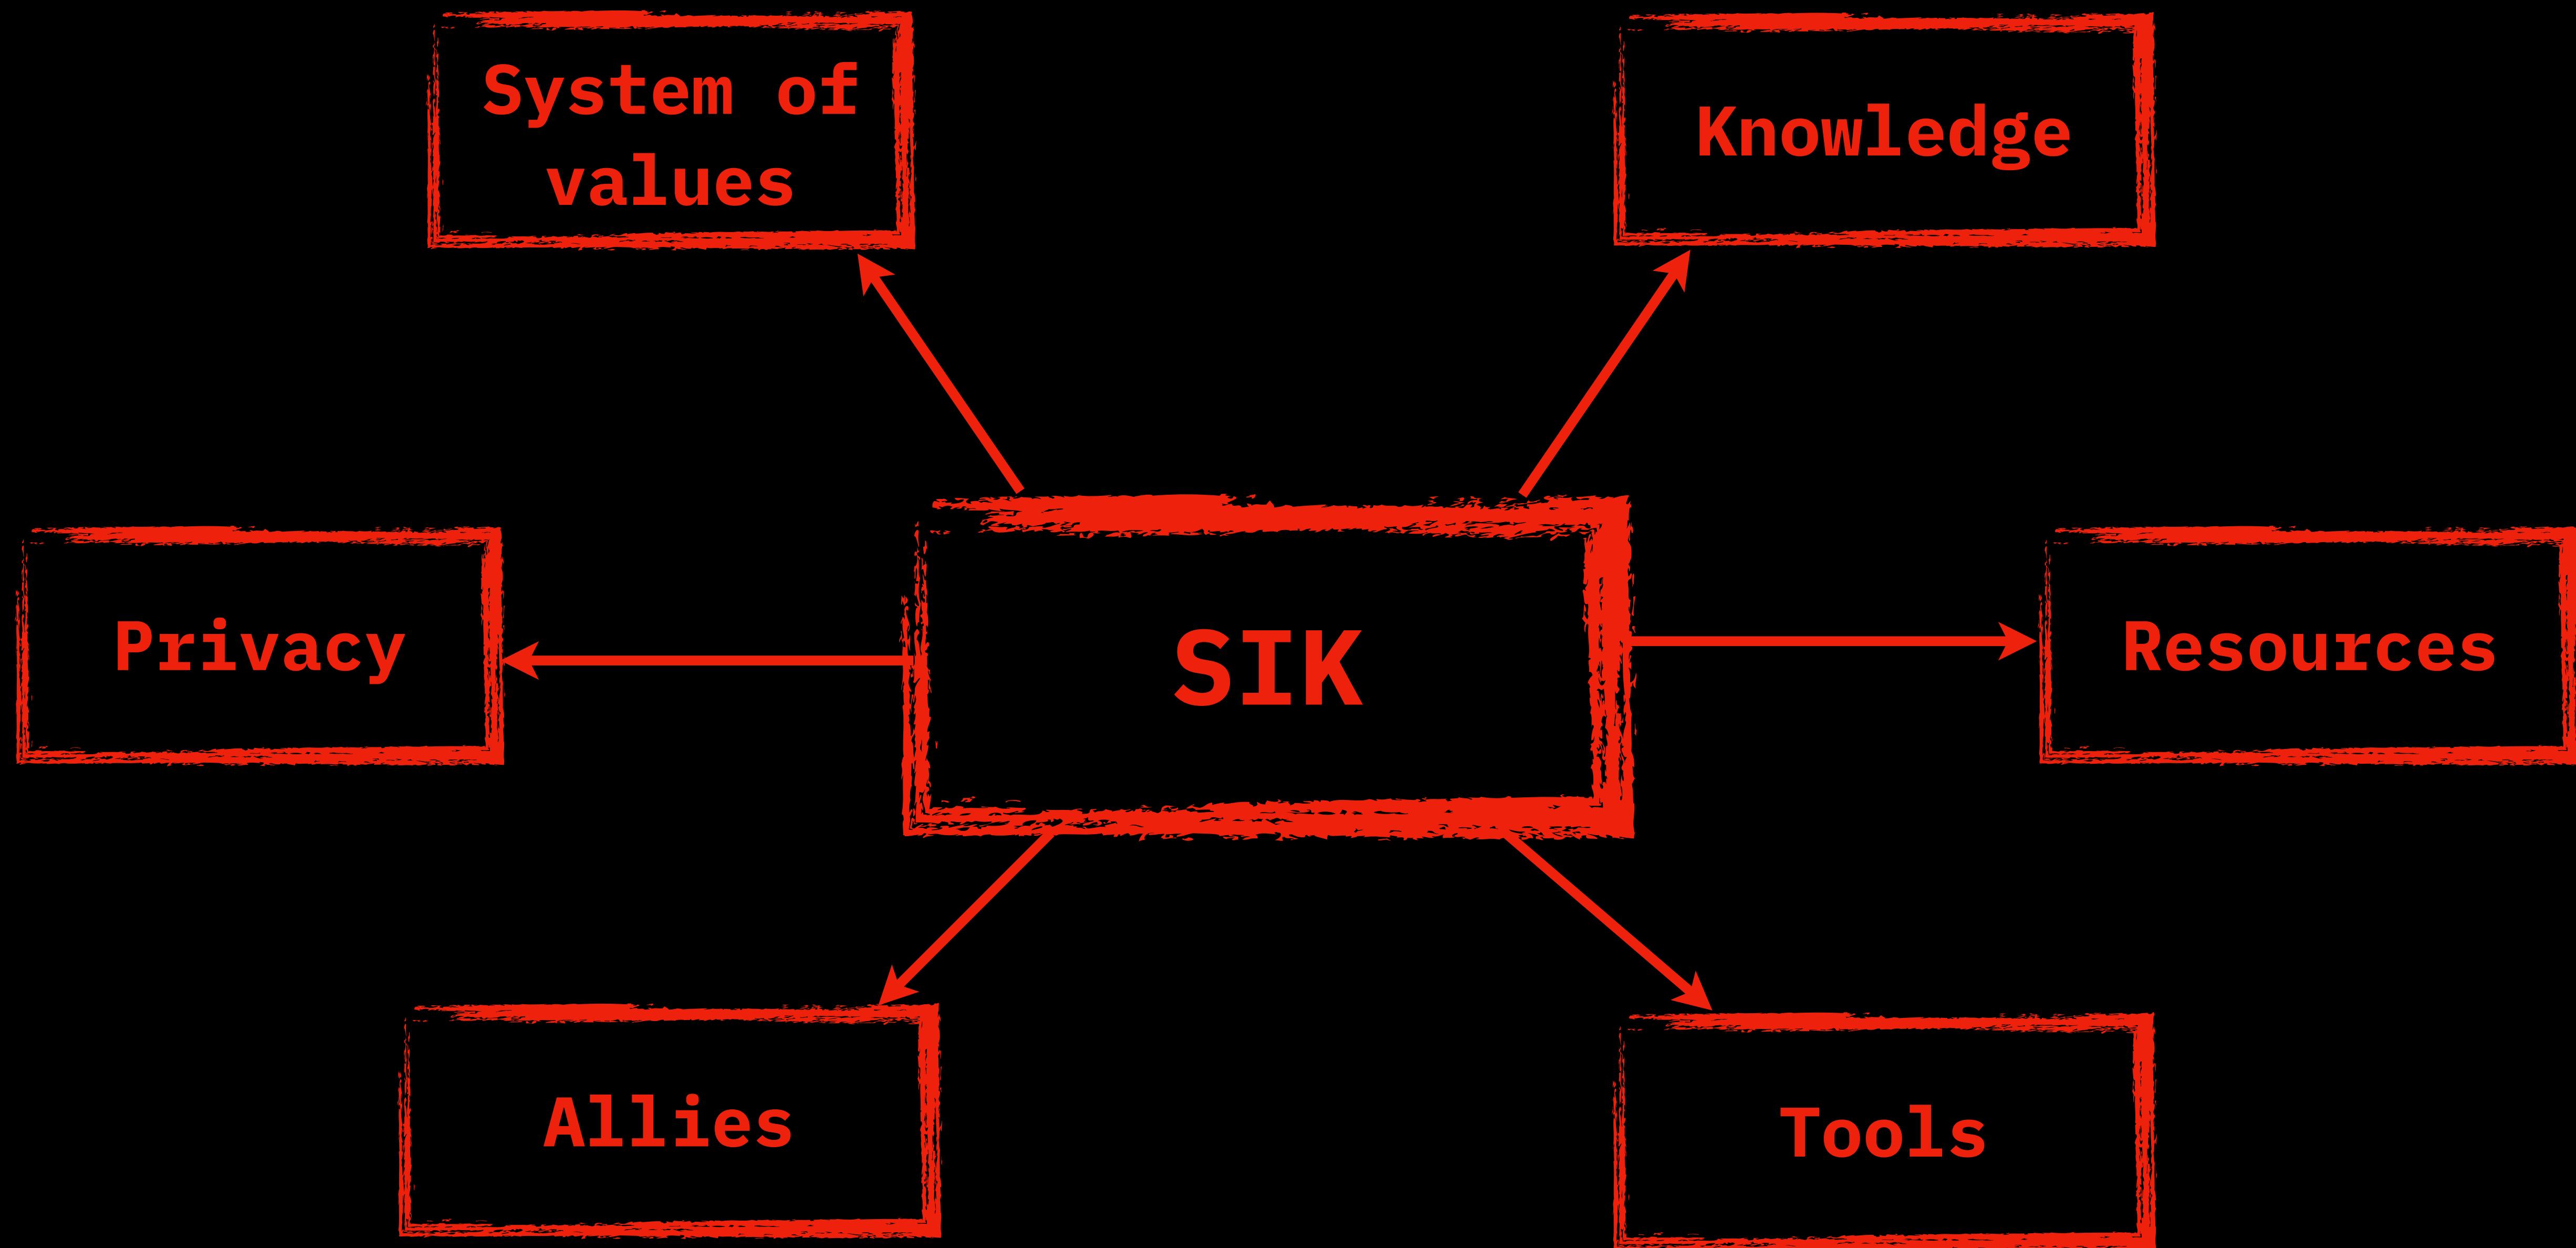

You'll need mine."

Sovereign Individual Kit

Part I

Introduction

I. Intrinsic system of values

Every system of values contains a story.

Being able to create stories, **to imagine the impossible**, has been the treat of human species, that helped us become who we are now - thinkers, builders, artists, engineers, philosophers.

Philosophy*

(from Greek: φιλοσοφία, *philosophia*, 'love of wisdom') - is the study of general and fundamental questions about existence, knowledge, values, reason, mind, and language. Such questions are often posed as problems to be studied or resolved.

*

!= Ethics

!= Moral

Philosophical method

- doubt existing parameters and the sense of wonder
- formulate questions and problems
- enunciate a solution
- justify the solution
- receive criticism

Philosophical method

- hard to verify/prove
- can lead to 'paralysis by analysis' or unproductive theorising, as it's far from practical application

But where does one draw the line between a genius and
madness?

Between legacy misconceptions and valuable experience?

**"If I had a world of my own, everything would
be nonsense. Nothing would be what it is,
because everything would be what it isn't.**

**And contrariwise. What it is, it wouldn't be.
And what it wouldn't be, it would. You see?"**

-Alice

3 questions

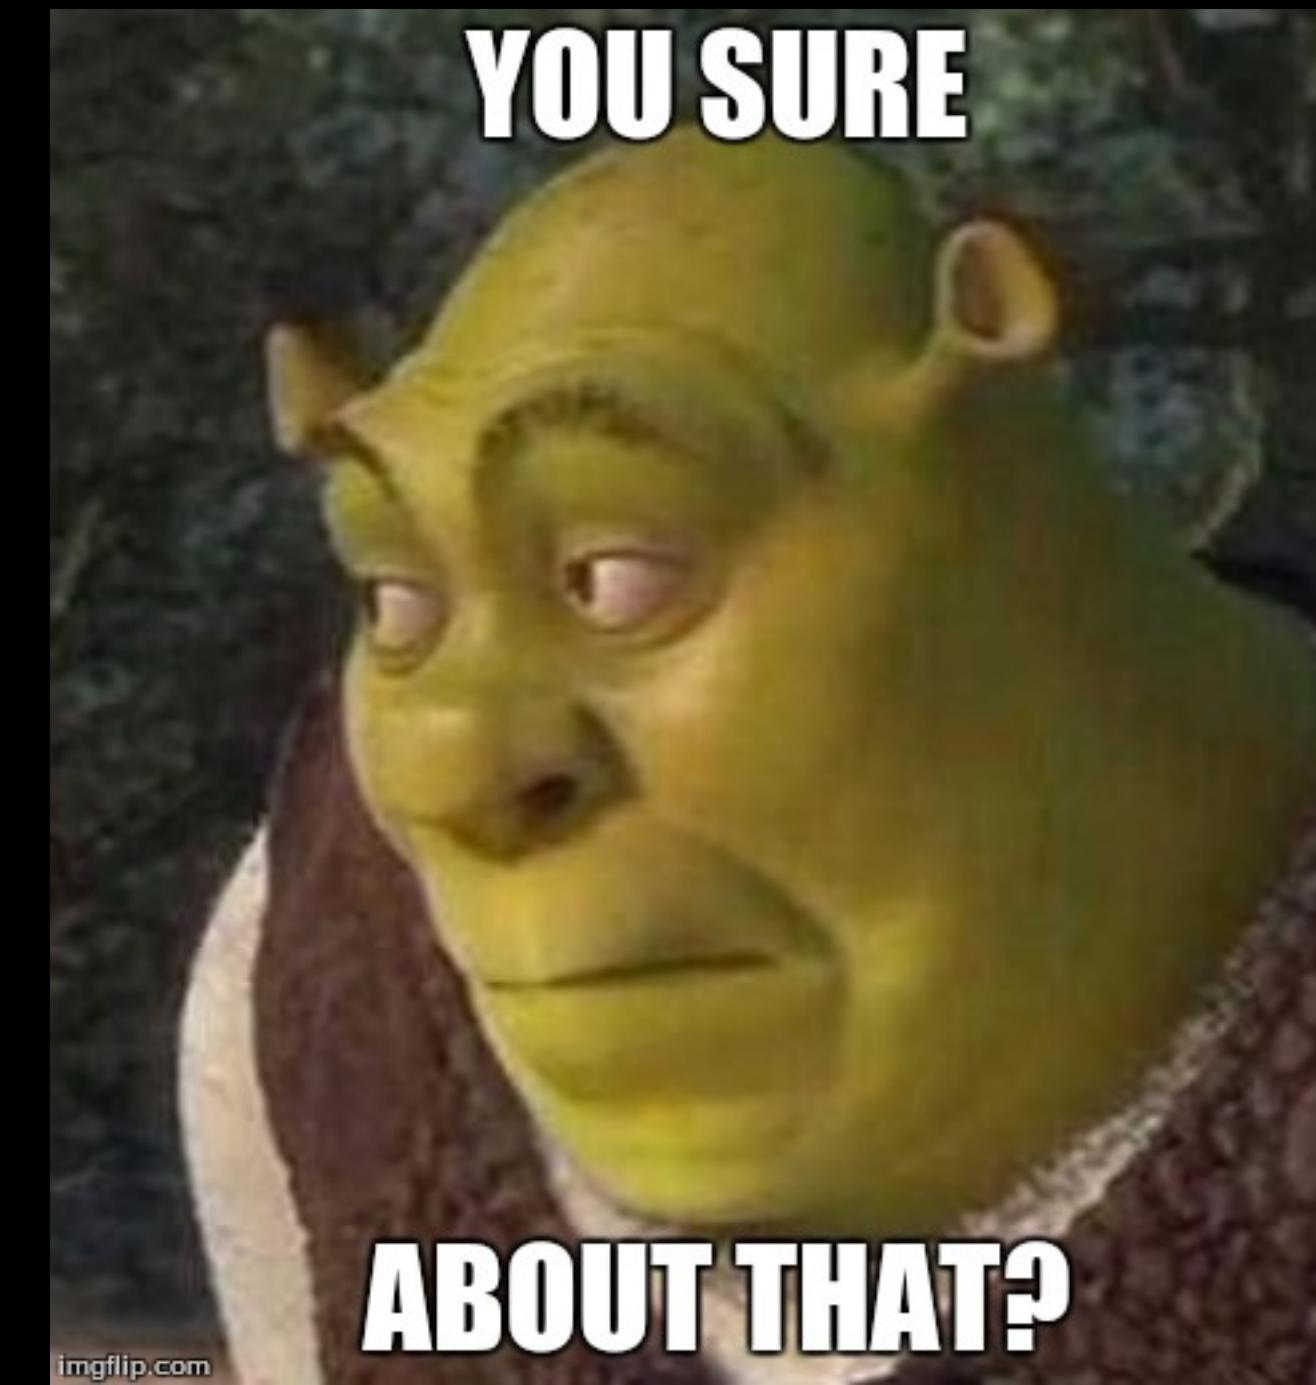

- Who is an individual?
- What is freedom?
- What is sovereignty?

Who is an Individual?

Individual:

- every living being on a planet*

*including plants

imgflip.com

Individual:

- [in]dividual/non-divisible - the one that stands outside the crowd
- has a well-formed understanding and perception of himself and outer world
- makes decisions according to individualistic decision making system, not the collective one

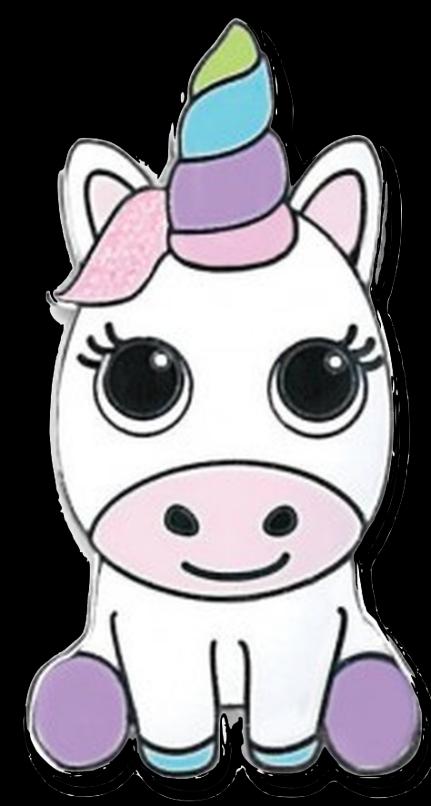

What is Freedom?

~~Love~~ Freedom is:

- when you can choose the master to serve
- when you can manifest social justice
- when you are warmly welcomed by your community
- when your government supports your business
- when healthcare fights all the diseases away

**SOMETHINGS NOT RIGHT
HERE**

Expectation

- when you can choose the master to serve
- when you can manifest social justice
- when you are warmly welcomed by your community
- when your government supports your business
- when healthcare fights all the diseases away

Reality

- 50 shades of masks shackles
- tyranny of the majority over an individual
- social stigma
- 'support bills' because money printing brrrrrrrr
- action paralysis (fear of loosing everything because of a test result)

What is Freedom?

Freedom:

- to be your own master
- to understand what you want every single moment and
- to be able to act on that desire, with no compromise and no asking for permission*

*asking for permission != cooperation with allies

Freedom

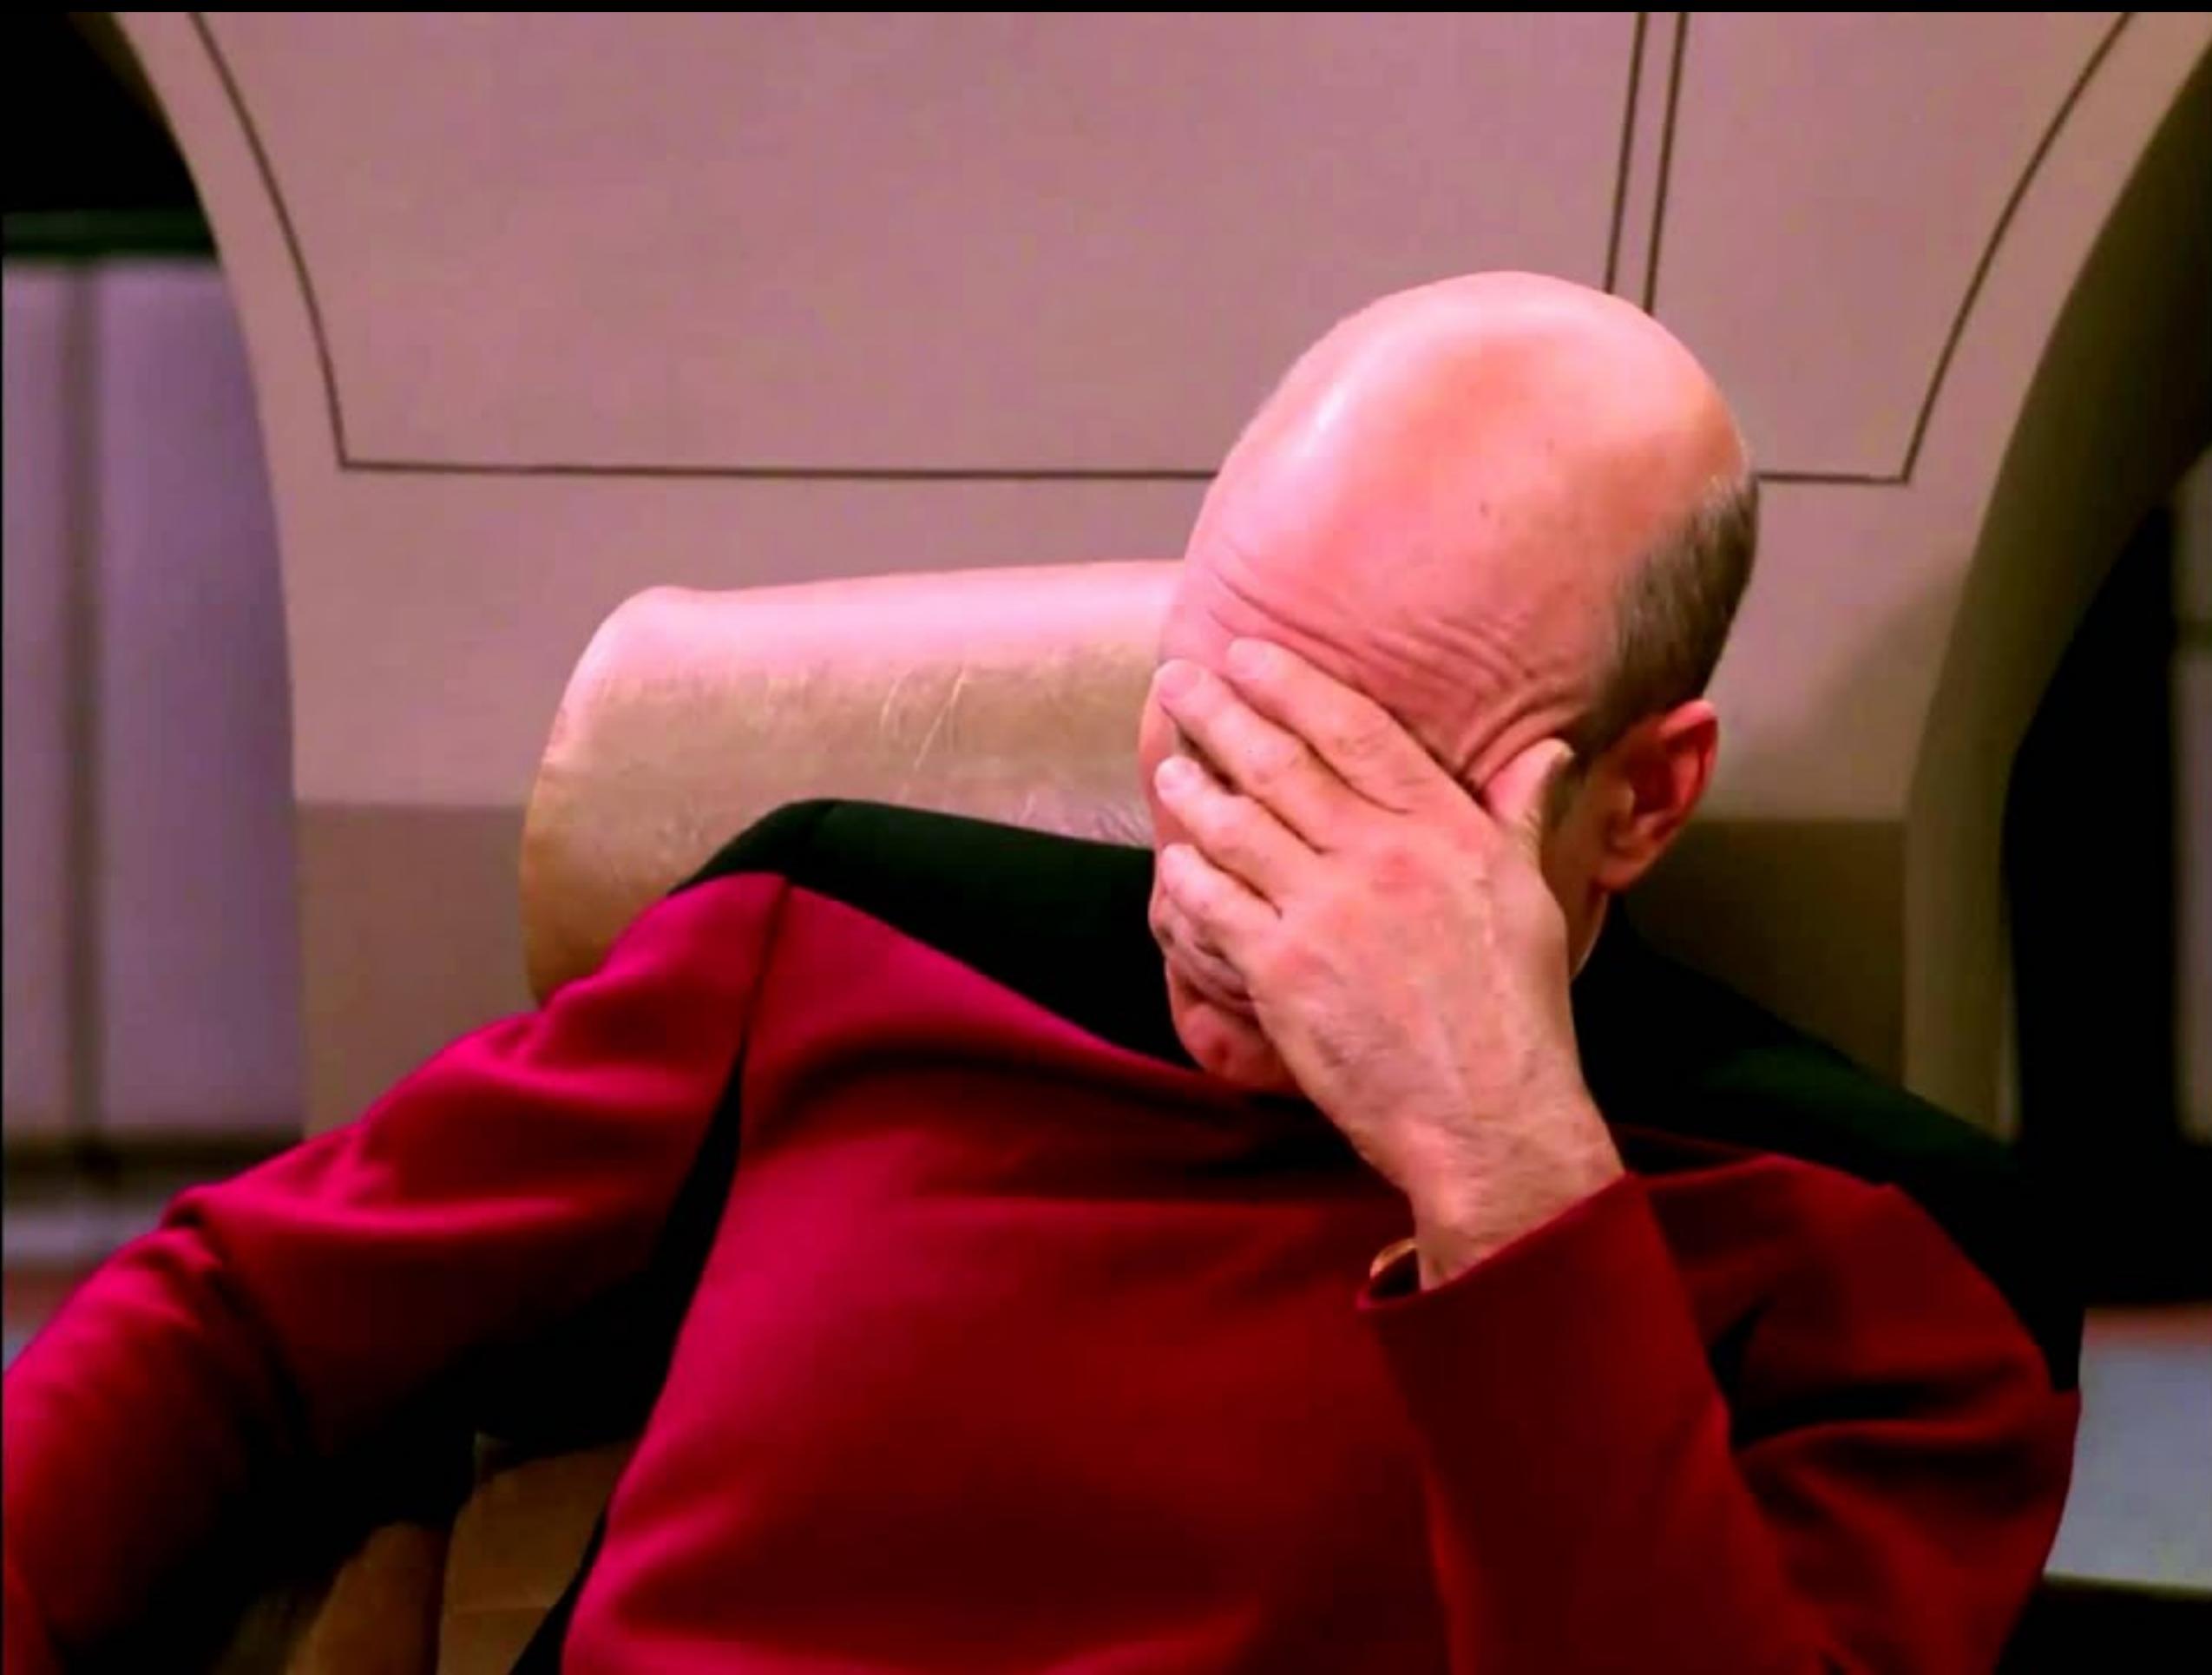

Freedom does not mean to be free in choosing your masters.
Freedom means to be strong and conscious to have no external masters.

The only power you need to submit to is the power of your own will. That is the only master a sovereign individual needs to seek for.

What is Sovereignty?

Sovereignty:

- feeling comfortable when being alone
- having a farm with potatoes and a cow
- having a gun
- to sovereign (verb)

Sovereignty

Being able to uncompromisingly fulfil your will and your desires, to attack your enemies and to defend yourself against anyone who goes against you, no matter what the cost is

Who is a Sovereign Individual?

Evolution of Free & Sovereign Individual:

- makes his own decisions
- discovers different restrictions and limitations of the freedom to make his own decisions
- desires to remove the limitations
- removes them

II. Knowledge

Science

a method for getting statistically-verified knowledge (with technology as its application). For the sake of reliability and robustness science sacrifices everything else.

Scientific method

- observe
- formulate hypothesis via induction (taking into account possible biases)
- experimental and measurement-based testing of deductions drawn from hypothesis
- refinement (or elimination) of the hypothesis based on experimental findings

Scientific method

- effective in minimising risk of failures
- becomes highly inefficient when you desire extreme progress in a limited time, need swift decisions and take rapid action on a dark territory, willing to take a high risk.

Knowledge

- History*
- Biology (incl. genetics, biochemistry, biophysics and biomechanics)
- Physics
- Math

** remember, child, that History is the greatest whore of all © my History teacher*

FIELDS ARRANGED BY PURITY

MATHEMATICIANS

III. Resources

- Time
- Money

- What would you do if you had it, if you were not limited on these resources?*

*Especially **time**, as if you have time, money is just... a matter of time :)

IV. Tools

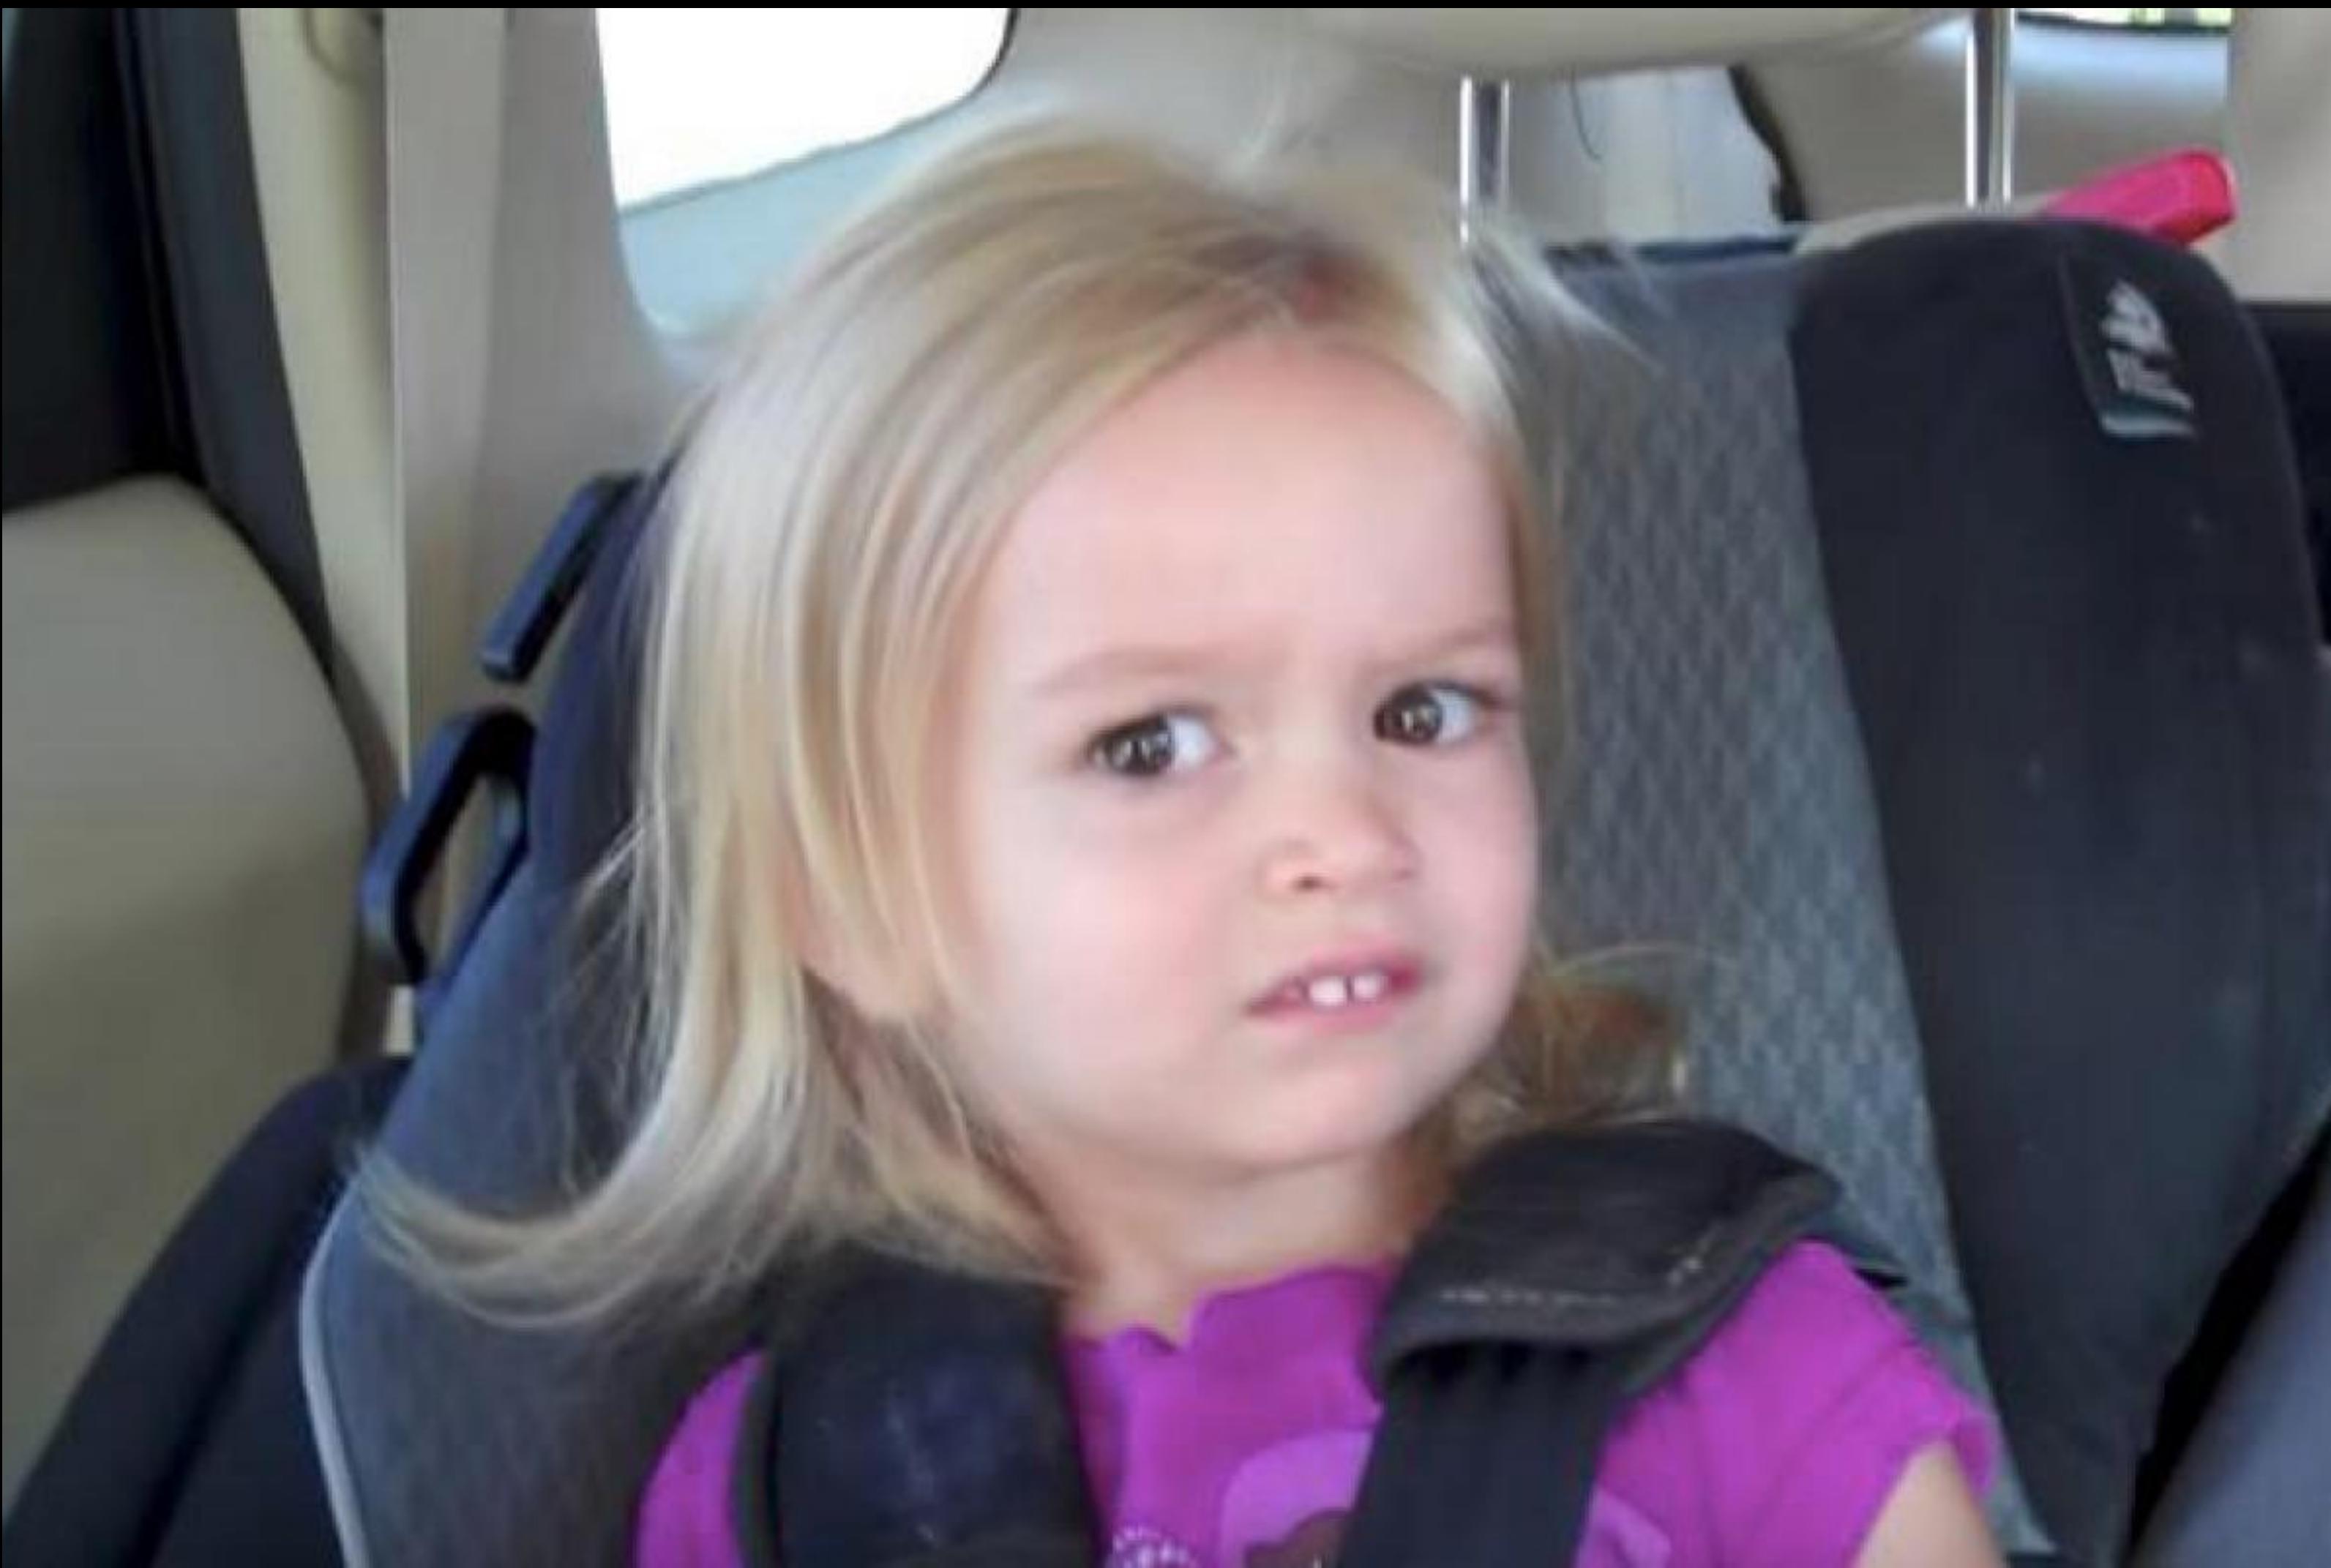

- defence
- attack*
- physical
- digital

** defence=attack - ability to predict your enemy's violent act against you and strike first (prevent the need to defend yourself and losing the advantage)*

V. Allies

Allies

- friends
- lovers
- parents

Ally

The one that shares your ethics and core values.

The one that is willing to pay the same price for achieving common goals and for protecting the shared values.

VI. Privacy

'Privacy'

- to mislead, lie
- to hide, run away from the battle
- to hide information that is crucial for your allies to know in order to avoid loses/succeed

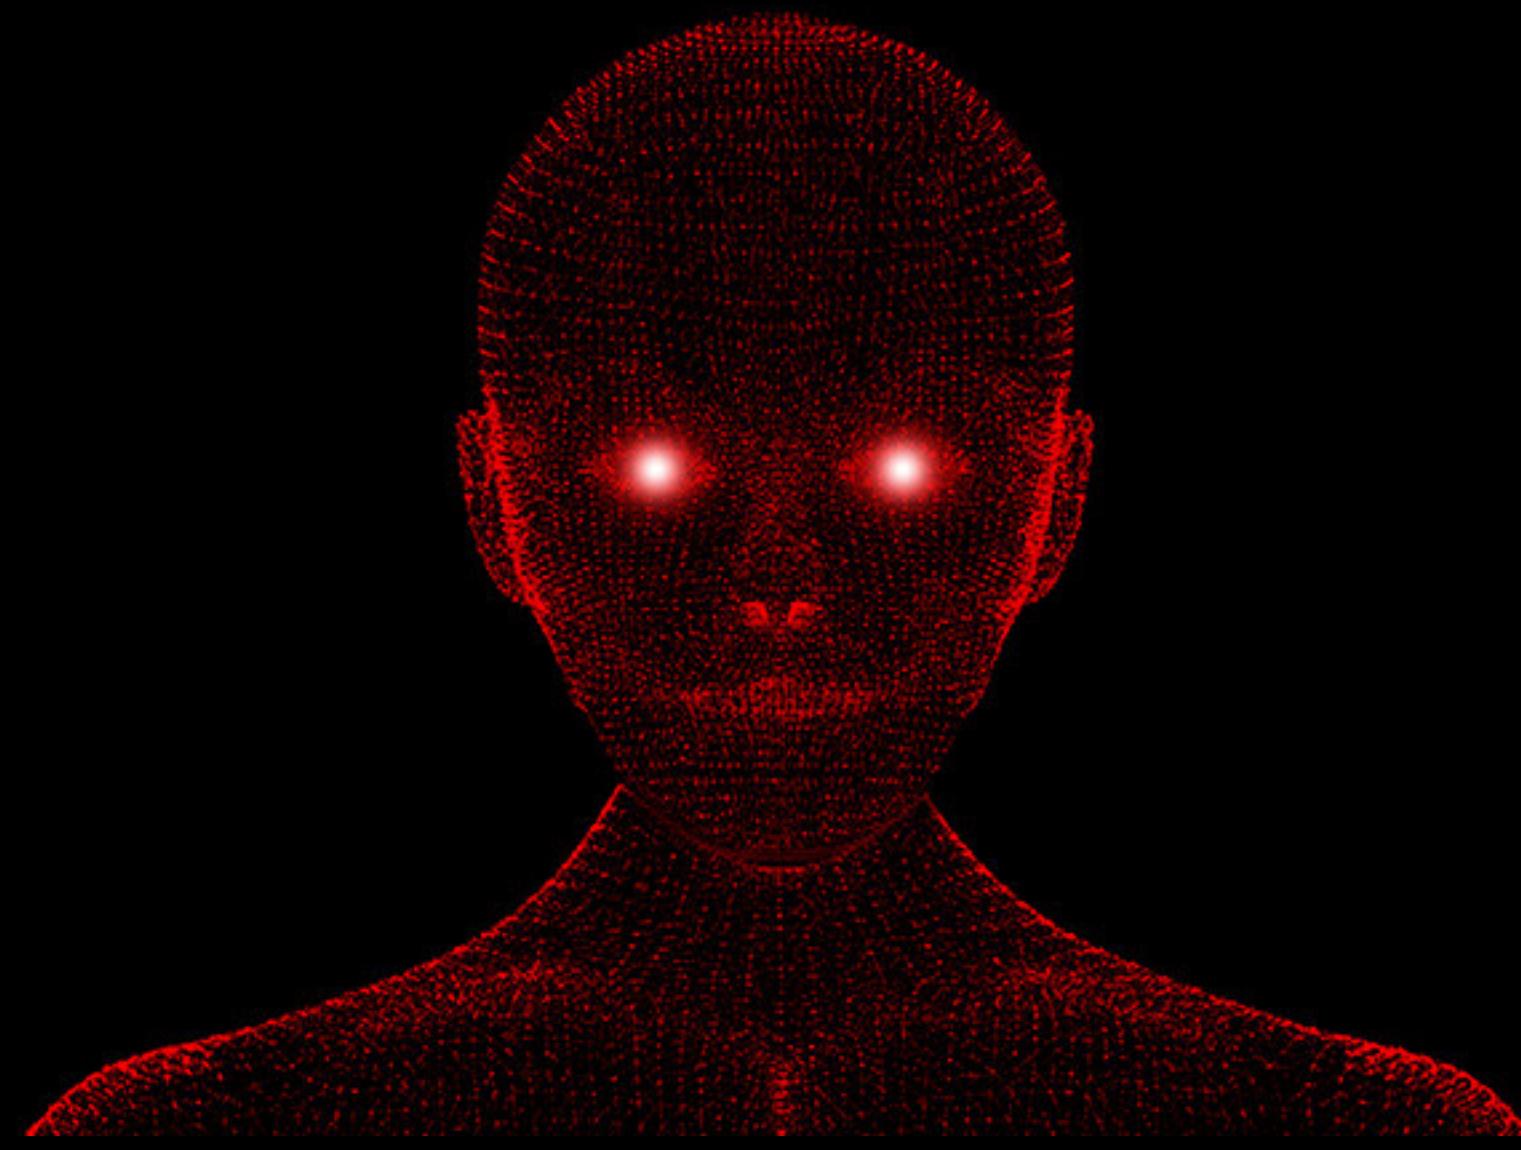

Privacy

- indivisible right of an individual
- to explore, learn and grow as a individual in order to then become a greater ally for the group

Summary:

- know what you want
- educate yourself, gathering, verifying and systematising the information according to your own, intrinsic system of values
- have resources and tools of both attack and defence at your disposal
- have allies around, the ones that share your ethics and core values
- have privacy by default

HOW?
